NOTE

Abrasion of the brass nozzle happens frequently when printing Fiberon™ PA6-GF25. Normally, the life of a brass nozzle would be approximately 9h. A wear-resistance nozzle, such as hardened steel and ruby nozzle, is highly recommended to be used with Fiberon™ PA6-GF25.

Fiberon™ PA6-GF25 is sensitive to moisture and should always be stored and used under dry conditions (relative humidity below 20%).

If Fiberon™ PA6-GF25 is used as the support material for itself, please remove the support structure before excessive moisture absorption. Otherwise, the support structure can be permanently bonded to the model.

After the printing process, it is recommended to anneal the model in the oven at 100°C for 16 hours.
